

Welcome to Birdability!

 We have a stationary, **car-accessible spotting scope** set up by the solar panels and tennis courts.

We also have two “walking” options, both under a quarter mile:

 A **paved wheelchair accessible** trail, directly across Quincy Junction Road from this parking lot (bike path)

 An easy flat-terrain dirt path from the spotting scope station to the bike path

 At the Learning Landscape Outdoor Classroom, we have a seating area set up for stationary birding, “**bird-listening,**” crafts, and coloring pages for neurodivergent brains while waiting for the birds to come to us!
